

CLEANWISE PROJECT CASE STUDY

Six-School Roof & Gully Programme

A grouped evidence record for blocked-gully clearance and bird-contamination removal across six school sites.

CONFIRMED BRIEF

PROGRAMME

Six school sites

CONFIRMED FOCUS

Blocked gullies and bird contamination

EVIDENCE FORMAT

Six grouped three-image records

MAINTENANCE CONTEXT

Preventative drainage care

This project record brings together six user-confirmed school roof-and-gully cleaning groups. The programme evidence covers blocked-gully conditions and bird-contamination removal across six separate sites, with three photographs held against each group.

The individual schools are not named. Each group is therefore shown as a distinct site record rather than being combined into a fabricated single-building story or assigned a site-specific result.

PROJECT CONTEXT

Scope and method boundaries

PROJECT-SPECIFIC PLANNING

The confirmed work focused on roof and gully areas where clearance and bird-contamination removal were required.

Across a multi-site programme, the useful planning question is not whether every building is identical; it is how the scope, access and operational constraints are confirmed for each site.

CLEANWISE can coordinate a sequence of school requirements by keeping the site record, confirmed scope and visual evidence distinct. Blocked-gully clearance supports a preventative-maintenance aim around roof drainage, but this record does not claim a specific leak-prevention outcome at any individual school.

SUPPLIED PROJECT EVIDENCE

THE CLEANWISE APPROACH

Start with the documented condition and agreed scope.

A suitable project method is confirmed against the individual property, access and handover requirement rather than assumed from a photograph alone.

An organised delivery frame

WHAT A CLEAR PROJECT PLAN LOOKS LIKE

CONTEXT FOR THE AGREED SCOPE

01 · GROUP

Keep each school's evidence and scope as a separate three-image site record.

02 · CONFIRM

Review the relevant roof, gully and access context for the individual school.

03 · ADDRESS

Complete the confirmed blocked-gully and bird-contamination work within the agreed scope.

04 · HANDOVER

Maintain clear records without inferring individual outcomes from another site.

CLEANWISE uses this project frame to keep an enquiry organised: establish the real condition, define the requested work, confirm the property-specific arrangements and record the agreed scope clearly. This is a planning structure, not a claim that every building or project will require the same method.

EVIDENCE BOUNDARY

The photographs are arranged in six user-defined groups. They show roof, gully, access and working context; they do not name schools, establish an identical method for every site, or prove a particular drainage result.

- Images remain in their confirmed project context.
- Project descriptions avoid unsupported technical claims.
- No client endorsement or broader contract is inferred.
- Future requirements are reviewed on their own merits.

Why CLEANWISE?

COMMERCIAL REASSURANCE

A consistent commercial partner.

CLEANWISE combines director-led project oversight with a flexible regional contractor network, supporting both individual sites and larger multi-site cleaning requirements.

- **50+ SCHOOL SITES**

Experience supporting cleaning and specialist works across more than 50 school and education sites.

- **SCALABLE DELIVERY**

Resources can be increased around larger projects, tight deadlines and geographically distributed work.

- **DIRECTOR-LED OVERSIGHT**

A clear CLEANWISE point of contact supports the project from enquiry through to completion.

- **25+ SPECIALIST CONTRACTORS**

A regional network of more than 25 cleaning and specialist contractors helps match resource to the requirement.

- **£5M PUBLIC LIABILITY**

£5 million Public Liability Insurance supports delivery in commercial and specialist environments.

- **MULTI-REGION COVERAGE**

Operational coverage across Teesside, the North East, County Durham, Cumbria and Manchester.
