

CLEANWISE PROJECT CASE STUDY

Freebrough Academy

Tennis court cleaning

A factual visual record of supplied equipment, active-cleaning, surface-detail and aerial site evidence.

EDUCATION & OUTDOOR FACILITIES

TENNIS-COURT PROJECT RECORD

A defined court-cleaning project

PROJECT AT A GLANCE

SITE

Freebrough Academy outdoor court area

VISIBLE EVIDENCE

Equipment set-up, active cleaning, surface detail and aerial views

RECORD TYPE

Defined cleaning activity documented in supplied imagery

PROJECT TYPE

Tennis-court cleaning

WORKING CONTEXT

Marked outdoor court and surrounding enclosure

SCOPE BOUNDARY

No unconfirmed treatment, repair, coating, drainage or result claim

CLEANWISE completed a defined tennis-court cleaning project at Freebrough Academy. The supplied visual record shows equipment prepared at the court, active surface cleaning, a close surface-condition detail and aerial views of the marked outdoor facility. This document records the project activity that is evidenced. It is not presented as resurfacing, repair, repainting, coating, chemical treatment, a maintenance contract or a guarantee about future court condition.

EQUIPMENT AND COURT SET-UP

THE CLEANWISE STANDARD

Start with the individual surface, access and agreed working area.

Exterior cleaning is planned around the actual court and site conditions rather than assumed from another facility.

A practical approach for outdoor court work

PLAN THE WORKING CONTEXT FIRST

Before a similar outdoor-court project begins, the individual surface, agreed work area, access arrangements, weather, drainage, surface condition, timing and any site restrictions should be considered with the site contact.

This ensures the scope stays tied to the court in question. It also makes it possible to coordinate the appropriate equipment, working area and communication route for the confirmed requirement instead of promising a generic solution.

The Freebrough record shows a surface-cleaning activity with equipment positioned inside the court area. It does not confirm settings, products, wider maintenance work or a specialist treatment sequence.

AERIAL OVERVIEW · COURT AND ENCLOSURE

- Confirm the individual outdoor surface and accessible work area.
- Plan around site timing, weather and restrictions.
- Organise the required equipment around the agreed scope.
- Record the visible project context without overclaiming.

The documented cleaning activity

ACTIVE WORK WITHIN THE COURT AREA

ACTIVE SURFACE CLEANING

AGREED ACTIVITY

Tennis-court cleaning within the defined visible work area

EQUIPMENT RECORD

Supplied imagery shows equipment prepared and active work in progress

COMMUNICATION

Scope, access and any site restrictions should be confirmed for the actual requirement

HANDOVER

Photography provides project context; the academy retains its own acceptance process

The visual record documents an active surface-cleaning stage. It is useful project evidence, but it does not replace an individual condition inspection or establish a general method for another facility.

Evidence from the court

SURFACE DETAIL AND AERIAL CONTEXT

SURFACE-CONDITION DETAIL

AERIAL COURT DETAIL

TOP-DOWN COURT LAYOUT

The supplied imagery documents a marked outdoor multi-use court, its enclosure and visible work-stage context. It supports a conversation about the photographed court area, not a claim about unseen works or a quantified outcome. For future work, CLEANWISE would review the individual surface, access, intended use, time window and limitations before confirming scope, method or cost.

A clear record is part of good project control

WHY THIS APPROACH IS USEFUL

AERIAL PROJECT VIEW · ACTIVE WORK CONTEXT

For outdoor facilities, the quality of the project starts with clarity. The site needs an agreed work area, sensible planning around its conditions and a record that explains what has actually been documented.

The Freebrough Academy evidence shows those practical elements: equipment preparation, active cleaning, a close surface view and aerial context. It does not overstate what the project achieved or extend the scope into surface repair, resurfacing, coating, drainage correction or an unconfirmed treatment.

This transparent approach is why CLEANWISE is well-placed for similar exterior enquiries. The appropriate resource and project plan are matched to the confirmed site requirement, while the scope and visible evidence remain clear for the site contact.

CLEANWISE CAPABILITY IN PRACTICE

The best project record is clear about both the visible work and its boundaries.

CLEANWISE coordinates outdoor cleaning around the individual site requirement, access and operational detail before confirming a tailored scope.

Why CLEANWISE?

COMMERCIAL REASSURANCE

A consistent commercial partner.

CLEANWISE combines director-led project oversight with a flexible regional contractor network, supporting both individual sites and larger multi-site cleaning requirements.

- **25+ SPECIALIST CONTRACTORS**

A regional network of more than 25 cleaning and specialist contractors helps match resource to the requirement.

- **COMMERCIAL & SPECIALIST**

Experience across commercial, education, builders-clean, property, exterior and accommodation requirements.

- **DIRECTOR-LED OVERSIGHT**

A clear CLEANWISE point of contact supports the project from enquiry through to completion.

- **MULTI-REGION COVERAGE**

Operational coverage across Teesside, the North East, County Durham, Cumbria and Manchester.

- **£5M PUBLIC LIABILITY**

£5 million Public Liability Insurance supports delivery in commercial and specialist environments.

- **SCALABLE DELIVERY**

Resources can be increased around larger projects, tight deadlines and geographically distributed work.

NEED A RELIABLE CLEANING CONTRACTOR?

Discuss a one-off specialist project, ongoing support or a multi-site requirement.

CLEANWISE supports commercial clients, facilities-management providers, schools, property managers, landlords, construction companies and accommodation operators across the North East and wider northern regions.
